Contents of volume 43

Research Papers

Turbulence experiments in the swash zone
M. Petti and S. Longo 1

Estimating swash zone friction coefficients on a sandy beach
J.A. Puleo and K.T. Holland 25

Forced and self-organized shoreline response for a beach in the southern Baltic Sea determined through singular spectrum analysis
G. Różyński, M. Larson and Z. Pruszak 41

A study on siltation in access channel to a port
L.K. Ghosh, N. Prasad, V.B. Joshi and S.S. Kunte 59

Bottom friction in random waves plus current flow
D. Myrhaug, L.E. Holmedal, R.R. Simons and R.D. MacIver 75

Investigations on the reflection behaviour of a slotted seawall
S. Zhu and A.T. Chwang 93

An efficient solver for nearshore flows based on the WAF method
M. Brocchini, R. Bernetti, A. Mancinelli and G. Albertini 105

Energy balance of wind waves as a function of the bottom friction formulation
R. Padilla-Hernández and J. Monbaliu 131

Separation of incident and reflected waves in wave–current flumes
K.D. Suh, W.S. Park and B.S. Park 149

An analytic model for the prediction of wave setup, longshore currents and sediment transport on beaches with seawalls
P. Ruggiero and W.G. McDougal 161

Laboratory study of wave and turbulence velocities in a broad-banded irregular wave surf zone
F.C.K. Ting 183

On the application of static equilibrium bay formulations to natural and man-made beaches
M. González and R. Medina 209

Sediment movement under unidirectional flows: an assessment of empirical threshold curves
D. Paphitis 227

Waves at Holderness from X-band radar
J. Wolf and P.S. Bell 247

On the interaction of a solitary wave and a submerged dike
C.-J. Huang and C.-M. Dong 265

Contents of volume 43 287
